Cherub

Model: C Major Pentatonic (C4-C6)

Cherub

Model: C Major Pentatonic (C4-C6)

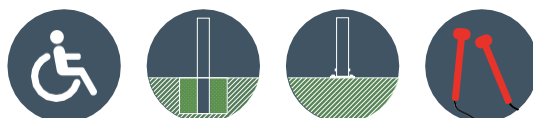

Dimensions:

Weight: 42kg Width: 71cm Depth : 20cm Max Height: 170cm

The Cherub's beautiful, elegant, and healing sounds make it the perfect addition to sensory gardens in children's centres, special needs environments, hospitals, nursing homes, schools, or colleges.

The 11 tubular bells are made from hand-tuned, heavy-duty anodized aluminium, each mounted individually over black anodized aluminium resonators, which are equally precisely tuned. Each resonator is individually capped with a polyurethane rain baffle. Finally, stainless steel security fixings deter vandalism and prevent the theft or removal of the instrument.

The Cherub can be wall-mounted or affixed to posts for easy installation on any surface. The elegant design is based on the Percussion Play Cadenza xylophone; however, each note has a half-degree spacing, creating a shape that, when mirrored, resembles the wings of an Angel - hence the inspiration for the name.

*NB: Installation through existing **synthetic grass**, repairs will be carried out but will be unable to match existing quality.*

*NB: Installation through existing **soft-fall**, repairs will be carried out but will be unable to match existing colour.*
