Bug-Beats

Model: Unpitched Percussion

Bug-Beats

Model: Unpitched Percussion

Dimensions:

Weight: 15kg Max Height: 1630mm

Bug: 330mmW 430mmH

Get ready to explore a fun collection of three Bug-Beats, each bursting with vibrant colours and decreasing in size as you go!

These playful "bugs" produce lively sounds that will spark young imaginations while they discover the wonders of nature.

- Flower Beetle (Large): Black and White Body / Red Wings
- Honey Beetle (Medium): Yellow Body / Green Wings
- Leaf Beetle (Small): Red Body / Purple Wings

Each "Bug" features wings made from strong, reinforced hollow polymer, designed like temple blocks, and equipped with notches to create a sensory, ridged surface.

As idiophones, they produce sound through the instrument's vibration, with each block's internal space serving as a resonating chamber. When you strike these colorful blocks with a mallet, they generate a fun, loud, echoing sound. Additionally, you can scrape the mallet along the notches to create a ratchet sound similar to that of a güiro.

Bug Beats can be mounted on a stainless-steel post or installed using fittings that can be retrofitted to our existing instruments, play equipment, fences, or walls.

Product Highlights:

- Visually stimulating and playful
- Great sound
- Engaging sensory resource
- Retrofit Option
- Sparks discussions about the natural world
- Suitable for Inclusive Playgrounds

*NB: Installation through existing **synthetic grass**, repairs will be carried out but will be unable to match existing quality.*

*NB: Installation through existing **soft-fall**, repairs will be carried out but will be unable to match existing colour.*
